Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

Applicant's affidavit filed 5-13-04 was found to be persuasive. The Examiner agrees that Applicant's claimed process would not have been obvious to one of ordinary skill due to a showing of unexpected results. In particular it is agreed that providing a first moisture absorbing heat absorbing heat generating fiber that accommodates providing a first moisture absorbing heat generating fiber that comprises a crosslinked acrylic fiber prepared by crosslinking with a nitrogen containing compound and by hydrolysis of uncrosslinked residues; providing a second heat retaining fiber or feather; drying the first fiber to an inherent minimum moisture content; and homogenously blending the first fiber with the second fiber in a weight ratio between 1 to 9 and 4 to 6 while the first fiber is at its inherent minimum moisture content. Conducting such a process is considered novel since it accomdates the special processing requirements of the fibers blended in accordance with the claimed invention. Normal processing conditions cannot be used effectively to homogenously blend the fiberfill of Spector's fabric with polyacrylonitrile fibers and heat retaining fibers.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should
